PROFESSIONAL SUMMARY

Full-stack .NET engineer with 5+ years building and scaling fintech and enterprise platforms, including systems for **bKash (50M+ users)** and JustGo's multi-region payments platform. Strong in **ASP.NET Core, C#, SQL Server, REST APIs, microservices, Redis/in-memory caching, and Azure DevOps CI/CD**, with front-end experience in **React, Angular, Blazor, and jQuery**. Proven results in performance tuning (~110 s → 9–13 s API), zero-downtime data migration (500 GB+), secure payment integrations (Adyen), and mentoring. Independently designed and built **EduNest**, a multi-tenant school management platform using Clean Architecture, Redis, and RabbitMQ. Comfortable owning features end-to-end and collaborating asynchronously across time zones.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core (Web API, MVC, Razor Pages), .NET 10 / .NET 9 / .NET Framework 4.8, Entity Framework Core, Dapper, LINQ, SignalR, Python

Frontend: React.js, Angular, Blazor, JavaScript / TypeScript, jQuery, HTML5, CSS3

Architecture: Microservices, Clean Architecture, Modular Monolith, Multi-Tenancy, CQRS, RESTful API Design, Swagger / OpenAPI, SOLID, Design Patterns

Databases & Caching: SQL Server, MySQL, PostgreSQL, Redis, IMemoryCache / Distributed Caching, Query Optimization, Indexing, Stored Procedures, Schema Design

Messaging: RabbitMQ, Asynchronous / Message-Based Processing

Cloud & DevOps: Azure (App Service, Azure DevOps Pipelines), Docker, Jenkins, CI/CD, Git

Security & Payments: JWT Authentication, RBAC, AES-256 Encryption, Adyen (ACH, BACS, SEPA, PayTo), Payment Gateway Integration, Audit Logging

Testing & Practices: xUnit, Unit Testing, TDD, Code Review, Agile / Scrum, GitHub Copilot & AI-assisted development

PROFESSIONAL EXPERIENCE

Software Engineer – Backend | JustGo Technologies Limited

April 2026 – Present

Dhaka, Bangladesh (Hybrid) | Sports membership & club-management platform | .NET 9, SQL Server, Dapper

- Delivered backend features across **Member Profile, Venue Management, Invoice Management, and Payment** modules in a modular .NET architecture, ensuring consistent API behavior and cross-module integration for web and mobile clients.
- Integrated **Adyen** payment methods — **ACH, BACS Direct Debit, SEPA Direct Debit, and PayTo** — with cart/store-based merchant account and API-key resolution across the **UK, US, Europe, and Australia**.
- Optimized high-traffic endpoints through query-level tuning and caching, reducing one grid API from **~110 s to 9–13 s (~90% faster)**; also resolved provider, currency, acquirer, refund-tax, and asynchronous payment-status issues across payment workflows.
- Built audit logging and observability — profile-level change tracking, receipt-level logs, and provider-response analysis — improving traceability and speeding up troubleshooting of failed and pending transactions.
- Implemented business-critical validation and workflow logic with unit tests (xUnit) for core scenarios, improving accuracy, reliability, and regression resistance.

DataSoft Systems Bangladesh Ltd. (Client: bKash)

Jan 2022 – Mar 2026

Dhaka, Bangladesh | Promoted from Software Developer to Software Engineer (Jan 2025)

Software Engineer (Jan 2025 – Mar 2026)

- Developed and maintained mission-critical **.NET Core** applications for bKash, sustaining **99.9% uptime** in production for **50M+ users**.

- Led a **zero-downtime SQL Server → MySQL migration of 500 GB+** data with a <2-hour cutover window, including full rollback and validation planning.
- Built automated Excel/PDF reporting pipelines with ASP.NET Core and **Jenkins CI/CD**, cutting manual effort by **70%** and deployment time from **4 hours to 30 minutes**.
- Resolved escalated production incidents through systematic root-cause analysis, eliminating recurring performance degradation during peak business hours.
- Designed **RBAC for 500+ users**, **AES-256 encryption** for sensitive data, and activity audit trails; mentored junior developers on SOLID, code review, and unit testing.

Software Developer (Jan 2022 – Dec 2024)

- Delivered **5+ internal operational tools** with ASP.NET Core and Blazor, improving business-process visibility across departments.
- Optimized SQL queries and stored procedures, reducing report generation from **10 minutes to under 2 minutes (80%)**.
- Built secure **RESTful APIs with JWT authentication** handling **10K+ daily requests at <200 ms** average response time.
- Diagnosed and resolved defects across UI, business logic, and database layers to keep operations running smoothly.

Freelance Software Developer | Self-Employed (Remote)

2021 – 2022

- Delivered ASP.NET / C# backend and SQL Server projects for remote clients, covering API development, schema design, and bug-fix contracts.

KEY PROJECTS

bKash Integrated Sales Management System (ISMS) | .NET Core, SQL Server, MySQL, jQuery

- Nationwide sales platform now handling **3x peak transaction volume** on the same infrastructure after index and query-plan optimization.
- Replaced a **40-hour monthly manual reconciliation** with a **2-hour automated compliance report** (~450 person-hours saved per year).

JustGo – Sports Membership & Club Management Platform | .NET 9 / .NET Framework 4.8.1, SQL Server, Dapper

- Enterprise-scale modular REST API platform covering membership, organization, booking, venue, invoice, class, and results domains, serving web and mobile clients.

EduNest – Multi-Tenant School Management System (Independent Project)

.NET 10, Blazor, MSSQL, EF Core, Redis, RabbitMQ

- Built a **multi-tenant** school management platform as a modular monolith using **Clean Architecture** (Domain, Application, Infrastructure, API layers).
- Implemented tenant-level data isolation on shared infrastructure, enabling new school onboarding without separate deployments.
- Added **RBAC** (super admin, admin, school-level) with **JWT authentication** and tenant-scoped authorization, plus **Redis** distributed caching and **RabbitMQ** async processing.
- Delivered a payment CSV export with cent-level reconciliation logic, eliminating rounding discrepancies in financial records.

EDUCATION

B.Sc. in Computer Science and Engineering | Royal University of Dhaka

2015 – 2019

CGPA: 3.70 / 4.00 (Top 10% of cohort)

CERTIFICATIONS

- Advanced SQL and Database Optimization (2024) • ASP.NET Core Development – BITM & freeCodeCamp (2018)
- In progress: Microsoft Azure Fundamentals (AZ-900)
