

MD. RAKIB AHASAN

Senior .NET Engineer | Senior Backend Engineer (.NET) | Fintech & Payments | 5+ Years
+880 1770 637360 | bd.rakibahasan@gmail.com | linkedin.com/in/rakib-ahasan | github.com/Rakib-Ahasan
Portfolio: rakib-ahasan.github.io/Rakib-s-Portfolio
Dhaka, Bangladesh (UTC+6) | Open to Remote: US, UK, EU, Canada, Australia | Relocation with visa sponsorship

99.9%	500 GB+	~90%	70%	4h → 30m
Uptime, 50M+ users	Low-downtime migration	API response-time cut	Less manual reporting	Deploy time

AVAILABILITY

- **Visa Sponsorship Required:** Yes (for relocation roles); no sponsorship needed for remote roles
- **Notice Period:** Immediate to 4 weeks
- **Time Zone Flexibility:** Based in UTC+6; flexible to overlap with any time zone (EU, US, Australia)
- **Languages:** English (Professional, C1), Bengali (Native), Arabic (Intermediate)

PROFESSIONAL SUMMARY

Senior .NET backend engineer with 5+ years building and scaling fintech and enterprise platforms, including systems for **bKash** (50M+ users, 99.9% uptime) and JustGo's multi-region **Adyen** payments platform. Strong in **ASP.NET Core (.NET 9/10)**, **C#**, **SQL Server**, **REST APIs**, **microservices**, **Redis**, **RabbitMQ**, and **Azure DevOps CI/CD**, with front-end experience in **React**, **Angular**, **Blazor**, and **jQuery**. Proven results in performance tuning (~110 s → 9–13 s API), minimal-downtime data migration (500 GB+), secure payment integrations, and mentoring junior developers. Independently designed and built **EduNest**, a multi-tenant school management platform using Clean Architecture, Redis, and RabbitMQ. Comfortable owning features end-to-end and collaborating asynchronously across time zones.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core (Web API, MVC, Razor Pages), .NET 10 / .NET 9 / .NET Framework 4.8, Entity Framework Core, Dapper, LINQ, SignalR

Frontend: React.js, Angular, Blazor, JavaScript / TypeScript, jQuery, HTML5, CSS3

Architecture: Microservices, Clean Architecture, Modular Monolith, Multi-Tenancy, CQRS, RESTful API Design, Swagger / OpenAPI, SOLID, Design Patterns

Databases & Caching: SQL Server, MySQL, PostgreSQL, Redis, IMemoryCache / Distributed Caching, Query Optimization, Indexing, Stored Procedures, Schema Design

Messaging: RabbitMQ, Asynchronous / Message-Based Processing

Cloud & DevOps: Azure (App Service, Azure DevOps Pipelines), Docker, Jenkins, CI/CD, Git

Security & Payments: JWT Authentication, RBAC, AES-256 Encryption, Adyen (ACH, BACS, SEPA, PayTo), Payment Gateway Integration, Audit Logging

Testing & Practices: xUnit, Unit Testing, TDD, Code Review, Agile / Scrum, GitHub Copilot & AI-assisted development

PROFESSIONAL EXPERIENCE

Software Engineer – Backend | JustGo Technologies Limited

April 2026 – Present

Dhaka, Bangladesh (Hybrid) | Sports membership & club-management platform | .NET 9, SQL Server, Dapper

- Owned backend delivery across **Member Profile**, **Venue Management**, **Invoice Management**, and **Payment** modules of a modular .NET platform, keeping API behavior consistent across modules for web and mobile clients.
- Integrated **Adyen** payment methods — **ACH**, **BACS Direct Debit**, **SEPA Direct Debit**, and **PayTo** — with cart/store-based merchant account and API-key resolution, enabling payments across the **UK**, **US**, **Europe**, and **Australia**.
- Reduced a high-traffic grid API from **~110 s to 9–13 s (~90% faster)** through query-level tuning and caching.
- Resolved provider, currency, acquirer, refund-tax, and asynchronous payment-status defects across payment workflows, improving reliability of failed and pending transactions.
- Built **audit logging and observability** — profile-level change tracking, receipt-level logs, and provider-response analysis — speeding up troubleshooting and traceability.
- Implemented business-critical validation and workflow logic with **xUnit** tests for core scenarios, improving accuracy and regression resistance.

Software Engineer (Jan 2025 – Mar 2026)

- Developed and maintained mission-critical **.NET Core** applications for bKash, sustaining **99.9% uptime** in production for **50M+ users**.
- Led a **500 GB+ SQL Server → MySQL migration** with a <2-hour cutover window (minimal downtime), including full rollback and validation planning.
- Automated Excel/PDF reporting pipelines with ASP.NET Core and **Jenkins CI/CD**, cutting manual effort by **70%** and deployment time from **4 hours to 30 minutes**.
- Owned escalated production incidents through systematic root-cause analysis, eliminating recurring performance degradation during peak business hours.
- Designed **RBAC for 500+ users**, **AES-256 encryption** for sensitive data, and activity audit trails.
- Mentored junior developers on SOLID, code review, and unit testing.

Software Developer (Jan 2022 – Dec 2024)

- Delivered **5+ internal operational tools** with ASP.NET Core and Blazor, improving business-process visibility across departments.
- Optimized SQL queries and stored procedures, reducing report generation from **10 minutes to under 2 minutes (80%)**.
- Built secure **RESTful APIs with JWT authentication** handling **10K+ daily requests** at <200 ms average response time.
- Diagnosed and resolved defects across UI, business logic, and database layers to keep operations running smoothly.

Freelance Software Developer | Self-Employed (Remote)

Jan 2021 – Dec 2021

- Delivered ASP.NET / C# backend and SQL Server projects for remote clients, covering API development, schema design, and bug-fix contracts.

KEY PROJECTS

bKash Integrated Sales Management System (ISMS) | .NET Core, SQL Server, MySQL, jQuery

- Optimized indexes and query plans so the nationwide sales platform handles **3x peak transaction volume** on the same infrastructure.
- Replaced a 40-hour monthly manual reconciliation with a **2-hour automated compliance report** (~450 person-hours saved per year).

JustGo – Sports Membership & Club Management Platform | .NET 9 / .NET Framework 4.8.1, SQL Server, Dapper

- Enterprise-scale modular REST API platform covering membership, organization, booking, venue, invoice, class, and results domains, serving web and mobile clients.

EduNest – Multi-Tenant School Management System (Independent Project)

.NET 10, Blazor, MSSQL, EF Core, Redis, RabbitMQ

- Architected a **multi-tenant** modular monolith using **Clean Architecture** (Domain, Application, Infrastructure, API layers) with tenant-level data isolation on shared infrastructure, enabling new-school onboarding without separate deployments.
- Implemented **RBAC** (super admin, admin, school-level) with **JWT authentication** and tenant-scoped authorization, plus **Redis** distributed caching and **RabbitMQ** asynchronous processing.
- Delivered a payment CSV export with cent-level reconciliation logic, eliminating rounding discrepancies in financial records.
- Private codebase; architecture walkthrough available on request.

EDUCATION

B.Sc. in Computer Science and Engineering | Royal University of Dhaka

2015 – 2019

CGPA: 3.70 / 4.00 (Top 10% of cohort)

CERTIFICATIONS

- Advanced SQL and Database Optimization (2024)
- ASP.NET Core Development – BITM & freeCodeCamp (2018)
- In progress: Microsoft Azure Fundamentals (AZ-900)
